EXAMINER'S AMENDMENT

1) An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Fritz Klantschi, Attorney for Applicant, Reg No. 50333 on 3/10/05.

The application has been amended as follows:

12. (Currently Amended) A composite form editing method <u>embodied on a computer</u> readable medium for editing form data, which is constituted of a plurality of parts forms, to be overlaid on print data, said method comprising:

a storing step, of storing composite form setting data which describes objects and a dependency relationship among these objects, wherein the objects include a page which constitutes the form data and a parts form which constitutes the page; a displaying step, of displaying, on a display in accordance with the composite form setting data, the objects and the dependency relationship thereof as a tree which connects image objects corresponding to the objects;

a determining step, of determining a position where the image objects is dropped on the tree in accordance with an operation by an operator; and an editing step, of editing the description of the composite form setting data in accordance with the position where the image data is dropped determined in said determining step.

Art Unit: 2176

27. (Currently Amended) A composite form editing method <u>embodied on a computer</u> readable medium for editing form data, which is constituted of a plurality of parts forms, to be overlaid on print data, said method comprising:

a storing step, of storing composite form setting data which describes a dependency relationship among objects, wherein the objects include a page which constitutes the form data and a parts form which constitutes the page;

a displaying step, of displaying, on a display in accordance with the composite form setting data, the objects and the dependency relationship thereof as a tree which connects image objects corresponding to the objects;

a determining step, of determining a position where the image objects is dropped on the tree in accordance with an operation by an operator; and an editing step, of editing the description of the composite form setting data in accordance with the position where the image object is dropped determined in said determining step.

REASON FOR ALLOWANCE

2. The following is an examiner's statement of reason for allowance:

While the prior art teaches storage means for storing data which describes objects and dependency relationship among these objects, display means for displaying objects and the dependency relationship as a tree which connects image objects corresponding to the objects, means for determining where the image objects is placed on the tree and editing means for editing the description of the data. Specifically, the prior art teaches a hyperlinked relational database visualization system, a method and

Art Unit: 2176

apparatus for displaying a double-sided graphic image and a data processing system with automated at least partial forms completion.

The prior art fails to teach, as a combination with the limitations cited in the claims, a composite form editing apparatus for editing form data, which is constituted of plurality of parts forms to be overlaid on print data comprising pages which constitute form data and parts form which constitute the page. Specifically, the prior art does not teach a tree where the name of the parts form constitute a page composing the form data described in the composite form setting data as well as a type of page indicating whether a page is subject of both side printing with respect to each page.

- 2. Claims 26-28 read on the FCX file (see Applicant Remarks, second paragraph).
- 3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gautam Sain whose telephone number is 571-272-4096. The examiner can normally be reached on M-F 9-5 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Feild can be reached on 571-272-4090. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
